### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The closest prior art to that of the instant invention in US6387483 to Hokkyo et al. Hokkyo fails to teach a soft underlayer containing Fe, Ta, and C and  $\alpha$ -Fe nanocrystals. While the use of soft magnetic films containing Fe, Ta, and C is known in the art of magnetic recording media, there is no teaching in the art of the formation of  $\alpha$ -Fe nanocrystals in a film containing Fe, Ta, and C. Further, Hokkyo fails to teach an amorphous metal layer between an Fe, Ta, and C containing soft magnetic layer, wherein the amorphous metal layer contains Ni, Zr, and Ta. While the use of this type of amorphous metal layer is known in the art, as shown by US2002/0064690 to Chen et al., there is no teaching or motivation to utilize this layer in combination with an Fe, Ta, and C containing soft magnetic layer that contains  $\alpha$ -Fe nanocrystals.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
